

Newman Quartz Watchclock System

Mechanical Watchclock

Our battery-operated Newman Quartz watchclock delivers all the dependability you'd expect from a Newman, but with a reliable quartz movement. Like its famed mechanical counterpart, the Newman Quartz watchclock provides a 24-hour record directly embossed on a paper time dial by means of raised numerals on the recording keys. The Newman Quartz watchclock is lightweight and is built to withstand rugged use with a die-cast aluminum housing and a tough, nylon case. And it never needs winding.

Benefits -

- Provides motivation for security officers to perform their assigned rounds, plus conclusive documentation that they have done so
- Helps reduce the risk of fire, burglary, vandalism and industrial mishaps thus saving money on reduced insurance premiums
- Easy to install using simple tools - a drill and a screwdriver
- Produces a secure, tamper-resistant record with dials that are virtually impossible to counterfeit, alter or tamper with
- Economical - ideal for users with restricted security budgets or sites with up to 40 control points
- Never needs winding; one "AA" battery provides one year of trouble-free operation

Features -

- Lightweight and easy to carry
- Built to withstand rugged use with a die-cast aluminum case
- Cover is secured by a lock
- The entire clock is enclosed in a rugged nylon pouch
- 24-hour record embossed directly on dials from raised numerals on recording keys without ribbon, carbons, or inking devices
- Highly accurate precision quartz movement
- Accommodates up to 40 stations
- Tampering detector indicates the exact time the case cover is opened or closed
- A shoulder strap allows the clock to be carried in a protected position

Operation -

- Install a key station at each control point that the officer is to visit during his rounds
- Insert a new record dial into the clock, set the time and give the clock to the security officer
- As the officer visits each control point, he removes the recording key from the station, inserts it into the clock and turns the key. This registers the station number on the recording dial in the clock at the correct time of day.
- The recording dial has a ruled space for each of the 24 hours of the day. The advancement of the dial is synchronized with the clock mechanism, so that each time a station is registered, its number is embossed at the correct time of day and follows the previous registration. The recording keys are designed such that a missed station causes a conspicuous gap on the dial.
- The daily record is removed by simply unsnapping the locknut and removing the dial, and inserting a new one.
- When the dial is inspected, any stations missed or rounds not performed can be readily seen.

Key Stations -

- Key station models that meet the requirements of every setting
- Easily and quickly installed by plant or office maintenance personnel, with only a screwdriver and drill
- Each key station installed with aluminum seals
- Any attempt by security personnel to collect the keys causes damage to seals, which is readily detected by routine inspection
- Chain holding key made from continuous links of stainless steel
- Chain is anchored such that any attempt to detach it from the station will create noticeable damage

Complete System Requirements-

- Newman Quartz Watchclock
- Key Stations -
Indoor/outdoor - SDC-90 (Cyclocac® thermoplastic), SDA-90 (Powder-coated cast aluminum)
Institutional - SSKL-90 (drawn steel with cover lock) or SSK-90 (drawn steel)
- Dials - BX-3924

All- Purpose Indoor/ Outdoor Key Stations -

- Models SDC and SDA - surface mounted with simple lift-up covers for easy access
- Easily and quickly installed by plant or office maintenance personnel, with only a screwdriver and drill
- Suitable for indoor or outdoor factory and office locations
- SDC is molded from high-impact Cyclocac® (ABS) thermoplastic
- SDA is durable, powder coated cast aluminum

Watchclock Dimensions

- Case - 5-5/8" Dia. x 2-3/8" Thick
- Clock Dial - 2-3/16" Dia.
- Shoulder Strap - 55" Long
